

JACOBI

WEALTH ADVISORS

In this month's recap: Stocks surge on receding inflation and recession worries, and better-than-expected second-quarter earnings.

U.S. Markets

Stocks posted big numbers in July, erasing some of their first-half losses. Investor sentiment was lifted by receding inflation and recession worries and a better-than-expected start to the second quarter earnings season.

The Dow Jones Industrial Average gained 6.73%, while the Standard & Poor's 500 Index rose 9.11%. The Nasdaq Composite led, picking up 12.35%.¹

Hopeful Signs

Stocks have been under pressure all year from rising inflation and slowing economic growth. There weren't many signs in July that suggested either inflation had cooled or that the economy was rebounding. Nevertheless, investors saw falling energy prices and persistent strength in the labor market as hopeful signs that any economic downturn may not be as severe as some expect.

Earnings Help Rally

Stocks briefly rallied after the Fed announced a hike in short-term interest rates of 75 basis points. All Fed members said they expected rates to rise to at least 3% by year-end, with half anticipating that rates may rise to 3.375%.³

Big Week of Data

The month of July culminated in perhaps the most critical week of the summer for the market, with investors awaiting information on corporate earnings, a Fed meeting decision on interest rates, and the release of an initial estimate of the second quarter GDP.

Investors Impressed

Earnings came out of the gate a bit shaky as a big box retailer missed earnings and guided future earnings estimates lower. However, subsequent earnings reports from big technology companies impressed investors. Markets were further relieved by the Fed's decision to hike rates by 75 basis points and Fed Chair Powell's comment that the pace of future rate hikes may slow.

Investors shrugged off a negative second quarter gross domestic product report as positive earnings surprises drove stocks higher into the close of the month.

Sector Scorecard

All 11 sectors posted gains for the month, including Communications Services (+3.87%), Consumer Discretionary (+18.44%), Consumer Staples (+3.20%), Financials (+7.19%), Health Care (+3.24%), Industrials (+9.50%), Materials (+6.15%), Real Estate (+8.52%), Energy (+9.66%), Technology (+13.45%), and Utilities (+5.45%).²

TIP OF THE MONTH

As you retire, look at the changes in your expenses. Will your mortgage soon be paid off? What business-related expenses will disappear, and what new expenses will emerge? This may matter greatly in your retirement strategy.

What Investors May Be Talking About in August

Historically, August has been positive for stocks, with an average return of 0.7% for the month. August also has more positive monthly performances (55) than negative (39).³

But August is also known for unexpected national and world events that have moved the markets in unexpected ways. Events that have occurred in August include the Asian currency crisis in 1997, the Long-Term Capital Management collapse in 1998, the downgrade of U.S. debt in 2011, and China's currency crisis in 2015.

During the month, the government will release a string of economic reports to give the Fed fresh insight into the economy for its late September meeting. After September, the Fed only has two scheduled meetings for the rest of 2022—one in early November and one in mid-December.

World Markets

Overseas markets rallied following the lead of the U.S. markets. The MSCI-EAFE Index gained 3.74% last month.⁴

Similar to U.S. markets, major European markets overcame growing recession fears and deepening energy woes. France picked up 8.87%, Italy rose 5.71%, Germany 5.48%, and the U.K. tacked on 3.54%.⁵

Pacific Rim markets were mostly higher, except for Hong Kong, which lost 7.79%. Australia gained 5.74% and Japan climbed 5.34%.⁶

Indicators

Gross Domestic Product: The economy shrank at an annualized rate of 0.9% in the second quarter as consumer spending moderated and businesses reduced inventories. GDP posted its second straight quarter of negative growth, meeting the technical definition of a recession. Unlike most recessions, however, the past two quarters have been marked by strong employer hiring.⁷

Employment: Non-farm payrolls increased by 372,000 in June, with the unemployment rate unchanged at 3.6%. Wages increased 5.1% year-over-year.⁸

Retail Sales: Retail sales rose 1.0% in June, beating consensus estimates.⁹

Industrial Production: Industrial production declined 0.2% in June, though it was higher by 6.1% in the second quarter.¹⁰

Housing: Housing starts slipped 2.0% as rising prices and mortgage rates weighed on buyer demand. It was the second consecutive month of declines.¹¹

Existing home sales fell 5.4%, while the median sales price climbed 13.4% to another record high of \$416,000.¹²

New home sales declined 8.1% in June, falling to levels not seen since April 2020. Year-over-year sales were down 17.4%.¹³

Consumer Price Index: Prices of consumer goods and services climbed 1.3% in June. The 12-month increase was 9.1%, a 40+ year high. Core inflation (excluding volatile food and energy prices) remained elevated as well, rising 0.7% from May's levels and 5.9% from a year ago.¹⁴

Durable Goods Orders: Orders for products designed to last three years or more rose 1.9%. When excluding defense spending, durable goods orders were up a more modest 0.4%.¹⁵

QUOTE OF THE
MONTH

“The most valuable player is the one who makes the most players valuable.”
- PEYTON MANIING

The Fed

Fed officials agreed to a 0.75 percentage point hike in the federal funds rate, acknowledging that the economy has slowed since the Federal Open Market Committee in June.¹⁶

In a post-meeting press conference Fed Chair Powell said that future rate hikes would be made on a meeting-by-meeting basis and that it may become appropriate to slow the pace of future interest rate hikes.¹⁶

MARKET INDEX	Y-T-D CHANGE	July 2022
DJIA	-9.61%	6.73%
NASDAQ	-20.80%	12.35%
S&P 500	-13.34%	9.11%

BOND YIELD	Y-T-D	July 2022
10 YR TREASURY	1.13%	2.64%

However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid.

THE MONTHLY
RIDDLE

Michael introduces Levi to his friends, stating that Levi's father is also the son of Michael's father. But Michael is an only child. So how are Michael and Levi related?

LAST MONTH'S RIDDLE: Tim says he heard that you can find \$200 stuffed between pages 147 and 148 of a romance novel at the library. What detail convinces you that he is wrong?

ANSWER: The pagination. Page 147 is a right-hand page, page 148 would be the left-hand page printed on its reverse. So nothing could be kept between these pages.
